EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY, College of Engineering
Masters of Science in Mechanical Engineering

- Concentration: Design and Product Management

Atlanta, Georgia

May 2023

GPA: 4.00 / 4.00

Bachelor of Science in Mechanical Engineering

- Certificate: Operations and Supply Chain

May 2022

GPA: 3.89 / 4.00

WORK EXPERIENCE

MICROSOFT CORPORATION

New York City, New York

Product Manager II, HPC & AI

October 2025 - Present

- Own the AI Hardware Capacity Planning for Microsoft's contracted OpenAI Training supercomputer demand by coordinating and aligning with engineering, legal, SOX compliance, business development, finance, and supply chain teams
- Manage the handoff/delivery of +\$1B worth of GPUs, Storage, CPUs, and HPC CPUs for contracted supercomputer training demand by actively mitigating roadblocks to on time delivery
- Ensure all processes and communications between Microsoft and the customer are documented for future audits and SOX compliant
- Report out the forecasts and delivery status of hardware which are consumed in executive forums all the way up to the CFO
- Formed and lead regular rhythm of business by gathering engineering teams' inputs to centralize all GPU SKU assumptions (e.g. kW/rack, performance, lead times, SLA%, etc.) to be used across all Microsoft in capacity planning and contracting. Any changes are reported out in executive forums on a bi-monthly basis
- Building and maintaining an AI agent that assists with customer help requests for operating and scaling on the Azure hardware as well as documenting all issues in a wiki

MICROSOFT CORPORATION

Redmond, Washington

Hardware Product Manager II, SPARC

March 2025 - October 2025

Hardware Program Manager, SPARC

August 2023 - March 2025

- Identified \$1B+ cost savings through Total Cost of Ownership (TCO) model analysis and scenario modelling at the datacenter level in collaboration with Engineering, Finance, Sourcing, and Capacity Planning for planning server hardware future Azure SKUs
- Leveraged competitive intelligence to model past, current, and future looking competitive SKU views (TCO and performance projections) to assist the planning team to build market competitive Azure SKUs (General Purpose Compute, Storage, HPC)
- Delivered market competition report outs to executive level to guide investments in competitive deltas
- Spearheaded business assessment/viability of new server and datacenter advancements (liquid cooling, storage disaggregation, etc.)
- Led rhythm of business to centralize all datacenter component performance, cost, and power estimates used by the org's 100+ engineers and PMs for modeling views
- Assisted in gathering customer requirements and analysis to drive Cobalt 100/200 ARM adoption for over 10+ internal customers
- Analyzed LLM Usage data (FLOPS, Tokens) for M365 to support which hardware metrics to optimize for by mining M365's LLM usage dataset with Kusto

MICROSOFT CORPORATION

Redmond, Washington

Hardware Program Management Intern, SPARC

May 2022 - August 2022

- Led a program to define and develop an Azure DevOps tool to allow the organization to communicate spec requirements with external vendors and internal customers
- Built a competitive analysis model based on historical trends that compared competitors' cloud instance offerings, predicted their growth in key metrics, and highlighted areas of focus for Azure's future instances

TESLA MOTORS, INC.

Fremont, California (Remote)

Global Supply Management Intern, Castings and Plastics CapEx

August 2021 - December 2021

- Collaborated with 30+ member cross-functional teams (global supply managers, engineers, legal, and PMs) on 10+ projects for quotes and integration into factories
- Managed 15+ global suppliers' RFQs, contract terms, planning stages, and invoice approvals
- Negotiated with suppliers for 10+ quotes for CapEx castings and plastics equipment and prototype parts to realize \$1M in savings
- Ran 5+ commercial reviews to justify which supplier to award project contracts to

SKILLS/INTERESTS

Software: Microsoft Office, VS Code, Azure DevOps, Xcode, SolidWorks, Fusion360, Cursor, Github Copilot, PowerBI, Tableau, Github

Programming: MATLAB, Java, Swift, SQL, Arduino-C/C++, HTML (5) & CSS (3), VBA, MySQL, Tableau, Kusto (KQL)

Other: Total Cost of Ownership (TCO) Modeling, Scenario Modeling, Competitive Analysis

CERTIFICATIONS

Certified SOLIDWORKS Associate in Mechanical Design (CSWA), Dassault Systèmes - December 2020

Lean Six Sigma Green Belt, Institute of Industrial and Systems - June 2020
